

10.7.2 Render - Freestyle - Core Options

Core Options.....1

Core Options

Freestyle core options.

Activating Freestyle in the *Render* context of the *Buttons* window will give you the following options:

Line Thickness

There are two different modes for defining the base line thickness:

Absolute

The line thickness is given by a user-specified number of pixels. The default value is **1.0**.

Relative

The unit line thickness is scaled by the proportion of the present vertical image resolution to **480** pixels. For instance, the unit line thickness is **1.0** with the image height set to **480**, **1.5** with **720**, and **2.0** with **960**.

Line Thickness

Only for *Absolute* line thickness: base line thickness in pixels, **1.0** by default.
